DETAILED ACTION

Election/Restrictions

1. Claims 14 and 15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species B, Figs. 4 & 5, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the "counterweight 16.1", "stop block 16.3", "pulley 14.3", "weight stack with holes 24", and a "selector pin 25" as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the various "control means" of claims 2 and 7 and the "set of counter-weights" of claim 5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood:

A. Where is the egress point of the cable?

B. The term "attachment" on page 7, line 18 is not clear. Is the term "attachment" in the specification, the same thing as the "control means" in the claims?

C. The counterweights are labeled 16, but the specification also refers to counterweights 16.1. Is this a typo, or are there multiple counterweights?

D. Is the "guide track" in the specification and the "curved track" in the claims referring to the same element?

E. It is not clear to the examiner how the counterweight works. The missing or incorrect labels of the drawings preclude the examiner from understanding the movement of each cable and how they interact with each other.

5. Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art. Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed). A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

6. The disclosure is objected to because of the following informalities:

Page 9, line 9, delete "weight stack 16" and insert --weight stack 13--.

Art Unit: 3764

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10 recites the limitation "the curved track" in line 3. There is insufficient antecedent basis for this limitation in the claim.
